CDOT Pipe Material Selection Guide Update
2015 Number 1, Page 1 of 1
Date: May 11, 2015

CDOT Pipe Material Selection Guide Update

The *CDOT Pipe Material Selection Policy* was initially developed by the Project Development Branch for approval by the Chief Engineer. However, this document is no longer required to be a separate policy document that requires the Chief Engineer's approval. Therefore, it will now be referred to as the *CDOT Pipe Material Selection Guide* and when the Drainage Design Manual is updated, this guide will be incorporated as a design procedure in the Drainage Design Manual.

Since CDOT approved the addition of Steel Reinforced Polyethylene Pipe as a pipe material alternative, a revision to the Selection Guide (formerly the Selection Policy) was required.

These Procedures for Pipe Material Selection (as updated April 30, 2015) supersede and replace all previous procedures, guidelines, and policies regarding the selection of pipe materials used by CDOT.

Until this guide is included in the Drainage Design Manual, it will be stored as a separate guide under the Bulletins and Manuals website. Therefore, the *CDOT Pipe Material Selection Guide* has been uploaded to the Design and Construction Project Support web page at:

https://www.codot.gov/business/designsupport/bulletins_manuals/cdot-pipe-material-selection-guide .
