

# Wadsworth Boulevard Alternative Elements - Travel Lanes and Sidewalks

- Travel lanes are the lanes that carry vehicles on a roadway.
- Travel lanes do not include auxiliary lanes, such as left- and right-turn lanes.
- Travel lanes are typically 12 feet wide.

Travel Lanes

- Sidewalks could be used by both pedestrians and bicyclists, depending on their width.
  - Sidewalks that are between 5 and 8 feet wide provide a safe place for pedestrians to travel.
  - Sidewalks that are 8 feet wide or greater safely accommodate both pedestrian and bicycle travel.
- Sidewalks can be attached or detached. Detached sidewalks require more space but are generally considered safer than attached sidewalks.
  - An attached sidewalk lies next to the roadway curb.
  - A detached sidewalk is separated from the roadway by a hardscaped or landscaped buffer.
